PERSONAL STATEMENT

I am a 20 year old filmmaker, photographer and aspiring director based in Cape Town, South Africa. I love everything that has to do with visual storytelling including film, photography and graphic design. I am a highly organised person and enjoy using my technical abilities to create meaningful experiences.

I have 5 years of experience working as a freelance filmmaker, editor and graphic designer. When I was 15, I made my first short film and have continued to experiment in the short film medium since then. I am passionate about what I do and have high standards for what I expect from myself and from others.

Please visit www.talithaneville.com to see my portfolio which showcases my work in filmmaking, photography and graphic design.
